Stay Ahead of the Curve in Networking

Taking the CWNA Wireless LAN Administration class helps open the door to wireless networking opportunities and will give you the knowledge you need for your career, your business, and your future. CWNA keeps your skills ahead of the curve in the rapidly changing field of computer networking.

Get Hands on Experience in Wireless

Taking the CWNA training class gives you hands on experience in wireless. You will learn what you need to know about designing, maintaining, and administering a wireless LAN.

You'll get hands-on experience in eight labs using wireless products from leading industry vendors:

- Cisco
- Proxim
- Colubris
- Symbol
- Netgear

Save Time and Be More Valuable

You will have the knowledge to work with any vendor's product line by taking the vendor-neutral CWNA training class. Your CWNA training gives you a competitive edge and allows you to make better informed decisions about your wireless network.

Can You Afford *NOT* to Learn Wireless?

The wireless networking industry has grown more than 1000% in the past four years while traditional networking sales have remained flat. You don't want to get left behind while everyone else is moving forward: sign up for the CWNA Wireless LAN Administration class today.

10 Ways to Build Your Skills

After completing this course you will have learned:

- Radio Technologies
- Antenna Concepts
- Wireless LAN Hardware and Software
- Network Design, Installation, and Management
- Wireless Standards and Organizations
- 802.11 Network Architecture
- Wireless LAN Security
- Troubleshooting
- Performance Tuning
- How to Perform Site Surveys
