Wireless Security Risks...

Is someone tapping on your wireless network ?

What do you do if someone takes over your Mobile Phone via the wireless network ?

Wireless Security Risks Seminar at Asia Speaker Bureau (ASB)

[Training Schedule](#)

Dear valued customer,

Our apologies for our previous newsletter dated March 2007, some people received the content in **Greek Characters**.

There are two reasons for this problem:

- 1 - Our marketing server used the Default language code and not the fixed English code (iso-code)
- 2 - Your local setting on your PC has been set to Default or another language and interpreters the message incorrectly.

Our apologies for any inconvenience caused.

Furthermore there has been an extra class scheduled in Malaysia (28th of May - 1st of June).

Our schedules are also online at www.globeron.com

Best regards,
 Ronald van Kleunen
